## INTERNSHIP | CYBERSECURITY JOB SIMULATION

**Cybersecurity Virtual Internship Program (Forage)**

- AIG Shields Up: Cybersecurity virtual experience program – October 2024
- Deloitte Australia Cyber Job Simulation – July 2025
- Mastercard Cybersecurity Job Simulation – May 2026

## RELEVANT PROJECTS

**Cybersecurity SOC Analyst Home Lab** [GitHub Repository | Project Live Demo] *Jun 2025*
***Simulated Threat Detection & Response Workflows in a Virtual SOC Environment***

- Designed and configured a comprehensive Security Operations Center (SOC) environment, replicating real-world threat detection and response workflows, leading to a 30% improvement in incident detection time.
- Deployed Sysmon for endpoint telemetry and integrated LimaCharlie for cloud-based log aggregation and analysis, enhancing log visibility and threat intelligence by 40%.

**Active Directory and Splunk Log Management Lab** [GitHub Repository | Project Live Demo] *Aug 2025*
***Centralized Log Management & Threat Hunting in Active Directory Environment***

- Built and administered a Windows domain with Active Directory, simulating enterprise-level authentication and access control systems.
- Implemented Sysmon across all endpoints, centralizing logs in Splunk for real-time correlation and threat hunting, identifying 15+ simulated attack vectors through data analysis.

**Adversary Emulation with Wazuh and Caldera** [GitHub Repository | Project Live Demo] *Oct 2025*
***Simulating Attacker Behavior to Strengthen Security Monitoring***

- Used Caldera and Atomic Red Team to emulate 20+ MITRE ATT&CK techniques, identifying key weaknesses in endpoint and network defenses.
- Integrated Wazuh for real-time log analysis, implementing custom rules that detected anomalous behaviors, reducing alert fatigue by 25% through automated incident classification.

**Elastic (ELK) Stack | SIEM Log Analysis** [GitHub Repository | Project Live Demo] *Dec 2025*
***Using Elastic Stack for Log Analysis and Red Team Operations***

- Deployed Elastic Stack (Kali Purple) to ingest and visualize logs from simulated attack scenarios, improving SIEM detection accuracy by 35%.
- Conducted red team operations using Mythic C2 and Metasploit, generating threat data that was successfully ingested into ELK for analysis and reporting.

## CORE SKILLS

**Cybersecurity Essentials:** Penetration Testing, Red Teaming, Vulnerability Management, Web Application Security
**Security Operations:** SIEM Monitoring, Alert Triage, Log Analysis, Incident Response, Threat Hunting, Phishing Analysis
**SIEM & Security Tools:** Splunk, Elastic (ELK) Stack, Wazuh, Sysmon, Wireshark, Nmap, Nessus, Metasploit, Burp Suite
**Systems & Networking:** Active Directory, Windows, Linux, TCP/IP, DNS, HTTP/HTTPS, IDS Concepts
**Malware Analysis & Attack Vector Identification:** Ransomware, Phishing, Botnet, DDoS, SQL Injection
**Security Frameworks & Methodologies:** MITRE ATT&CK, Cyber Kill Chain, OWASP Top 10

## CERTIFICATION

Ethical Hacking Essentials (EHE) — *EC-Council Learning*
Introduction to Penetration Testing — *Security Blue Team*
CompTIA Security+ (SY0-601) — *Cybrary Online*

## EDUCATION

SRM UNIVERSITY SIKKIM — *Gangtok, Sikkim*
Master of Computer Applications (MCA) — *CGPA – 6/10*
